ATUL MAURYA

FULL-STACK SOFTWARE DEVELOPER

8303606559 | atulmaurya83036@gmail.com | linkedin.com/in/atul-maurya-it

SUMMARY

Full-Stack Software Developer with 2.5+ years of experience building public health and digital pathology applications using Python, Django, React and TypeScript. Experienced in REST APIs, frontend development and offline data collection, with ownership of assigned features and close collaboration with the team.

EXPERIENCE

Project Technical Assistant | IIT Bombay, Mumbai **June 2024 - Present**

Work across frontend and backend development at TCTD, IIT Bombay, contributing to DGA, U-Mentor, AeonScan and Grow RCA. Build APIs, database models and reusable UI components, and handle assigned modules through implementation and integration. Collaborate with the team on requirements and technical decisions, enhance features and resolve application issues.

Full Stack Developer Intern | NextGen Lab, Mumbai **January 2024 - February 2024**

Contributed to team projects using React Native, Node.js, TypeScript, MongoDB and Django. Secured 2nd Place at Indian Collegiate Startup Week 2024 for "Traffic Light School" under the guidance of NextGen Lab, Patkar College.

KEY PROJECTS WORKED WITH TEAM

Projects developed as part of TCTD, IIT Bombay.

Grow RCA: A public health platform under development to support investigation of vaccine-preventable disease outbreaks and immunization gaps through field assessments, evidence collection and reporting for corrective action planning.

U-Mentor: A public health platform supporting immunization monitoring and mentorship of frontline health workers through assessments, field data collection and KPI dashboards.

DGA: A platform for assessing gaps in health facility infrastructure, services and resources through digital checklists, geographic maps and dashboards.

AeonScan: A digital pathology platform for uploading, viewing and analyzing digitized slides while managing associated samples and cases.

KEY RESPONSIBILITIES

- Developed Django and DRF APIs, models and business logic, with reusable React and TypeScript components.
- Implemented end-to-end frontend and backend features, API integrations and application workflows.
- Worked on user management, authentication, profiles, forms, dashboards, reporting and other modules.
- Built Enketo offline workflows in U-Mentor and DGA, plus KPI features and a support ticket module in U-Mentor.
- Developed maps and assessments in DGA, and sample upload and management workflows in AeonScan.
- Owned assigned modules, handled additional tasks, resolved issues and collaborated on feature delivery.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: Django, Django REST Framework

Frontend: React, React Native, HTML5, CSS3

Styling: Tailwind CSS

State and Routing: Redux Toolkit, TanStack Query, Router

Databases: PostgreSQL, SQLite, MongoDB

APIs: REST APIs, API Integration, Node.js

Forms: Enketo, Offline Submission, Sync

Maps: Leaflet, D3.js

Tools: Git, GitHub, Vite, npm, uv

EDUCATION

BSc in Information Technology | Patkar-Varde College, University of Mumbai
CGPA: 9.4 | August 2021 - June 2024

HSC | Prahladrai Dalmia Lions College — 84% | June 2020 - June 2021
